<b>At what age?</b>	11
<b>How long?</b>	2 years
Skin	
<b>Tone:</b>	fair
<b>Ability to tan:</b>	moderate
<b>Freckles:</b>	few
<b>Acne:</b>	No

<b>Describe your personality and character:</b>	I am friendly, smart and motivated. I am an introvert and love peace and quiet but to others, I can sometimes seem more like a "Type A" due to my confidence and outgoing attitude in social situations. I'm an extremely dedicated individual and once I make up my mind to do something, I like to do it thoroughly and well. I consider myself an intellectual and love learning new things.
<b>How would you describe your childhood?</b>	My childhood was pretty average. I was shy as a child and so I only had a few friends but the friends I did have were extremely close. I wasn't ever a big fan of lots of toys- I preferred to use my imagination to play. I loved reading, horses and the outdoors.
<b>What's your favorite childhood memory?</b>	One of my favorite childhood memories is of a state park in northern Minnesota where there is a campground we stayed in frequently. At the back of the campground, there is a huge natural rock formation. The first few times, my step dad and I climbed it together until I got the hang of it. After that, one of my favorite things to do was to climb to the top of the formation and then stand at the top and watch the campground and forest down below.
<b>Who has been the most influential person in your life, and why?</b>	I know it sounds cliché but the most influential person in my life is my father. He has taught me so many things and has really shown himself to be a prime example of so many of the qualities that I admire. He is hard-working, motivated, strong, honest, diplomatic, confident and courageous. At the age of 49, he is in near perfect health, running marathons and competing in triathlons frequently. He trains nearly 20

	hours a week, and regularly comes in the top 3 in his age group. He only started training and competing around age 40 so he wasn't really into it before that. He has worked so hard and has thrown himself into the competitions and has really improved and feels strong and confident. I find his achievement inspiring and motivating.
<b>What awards/accomplishments are you and your family most proud of?</b>	My most incredible accomplishment thus far has been spending 9 months living abroad on my own. I spent 6 months living in the UK, and then backpacked through continental Europe for another 3 months. This was an incredible adventure, and I'm very proud of having the confidence, resourcefulness and motivation to do it all on my own.
<b>Describe some of your hobbies and interests:</b>	I love being outdoors. Camping, canoeing, kayaking, hiking, etc... or even just laying out by a beach. Any time the weather is warm, I want to be outside, enjoying nature. I am a huge fan of the Minnesota Vikings and love watching and attending their games. In the winter (when all of Minnesota is hibernating), I like to read and play video games.
<b>What sports or activities have you excelled in?</b>	I love running and working out. I never had much time to participate in team sports due to my work and school schedule, so I unfortunately never got to experience team sports. I like strong cardiovascular workouts and have been incorporating interval training into some workouts. I have competed in several sprint length triathlons, and even came in 3rd place in my most recent race! I hope to do more soon, and perhaps work up to a half-marathon.
<b>Describe any artistic/musical talents you have:</b>	My whole family is extremely musical- personally, I think that singing is my best musical attribute. I was in several vocal groups during high school and was section leader in two groups. I also love visual arts- ceramics in particular. I make functional pottery, like mugs, dish sets, pitchers, teapots and other things that you can use daily.
<b>What are your future goals?</b>	I love my current job and am really enjoying the criminal justice field. Soon, however, I want to return to school to get my Masters degree, preferably in social psychology. Eventually, I would like to get involved in research and experiments in the social psychology field. Before entering graduate school, I want to spend some more time travelling

Asthma	Mother Me <i>Explanation</i> Mild asthma since childhood in both my mother and myself.

For Fun

<b>Favorite movies:</b>	I love historic epics- Braveheart is my favorite. I also love most action, crime and horror movies.
<b>Favorite Books:</b>	I just finished Julian May's Galactic Milieu & Pliocene era series- it's an 8-book sci-fi adventure. And I'm rereading the Song of Ice and Fire novels to go along with the new seasons of Game of Thrones. I enjoy some non-fiction books and psychology and art are frequent reads for me. For relaxation and fun though, I like crime mysteries, horror and fantasy novels.
<b>Favorite type of music:</b>	I love rock, and a lot of the newer country music like Blake Shelton and Gloriana. Muse is my favorite rock/pop group. I also have been listening to a lot of blues music recently, and am hoping to go to a big Blues Festival in Minnesota this year.
<b>Favorite food:</b>	You'll never see me turn down sushi- and recently I even learned how to make my own! I'm also a huge fan of fresh, authentic Mexican food.
<b>Are you a good cook?</b>	I don't spend a lot of time cooking, but I love to bake! Cupcakes, bars, and cookies are my favorite to make, and I love bringing them to share with family or coworkers.
<b>Do you sing in the shower?</b>	Not frequently- I prefer to sing in my car or while doing chores in my apartment!
<b>What's your favorite season?</b>	Definitely the summer. I love the heat and warmth of the sun and love the long days- it always feels like a more productive time of year.

What's your favorite holiday?

Independence Day

If you could be an animal, what would you be and why?

Probably a horse- horses are strong, smart and willful but are beautiful and majestic at the same time.

Why do you want to become a donor?

I think that I would be an ideal donor and I want to give back to the fertility community. My aunt was impregnated in 2005 through IVF with an egg and sperm donor and my beautiful cousin (he's 7 now! Hard to believe!) is a wonderful addition to our family. She had fertility issues, and went through several attempts at IVF and artificial insemination before she was able to carry to full-term. It was an incredible experience for her and for the rest of our family. I want to be able to give someone else who is having similar issues the ability to have the family that they want and the same incredible experience that my family was able to have.

Do you have a message you would like to share with the recipients?

I hope that your attempts at having a child are quick and successful. I know first-hand how much it can hurt a family when fertilization efforts take a long time. I want to help an intended family have the family that they want. I think that I am an ideal candidate and hope that you can achieve your desired family with my donation.
