Describe your personality and character:	Growing up I was always the quiet one. I had a shy personality but once I opened up you couldn't get me to stop talking. I grew up having a passion to help others in life. I have always been a sweet and loving young lady. A lot of people tell me I carry myself very well. I was the kid who was always scared to get into trouble, therefore I was always good. I have a strong personality at times because once I have my mind set on something I'm sure to accomplish it. I would also describe my personality as outgoing, funny, ambitious, compassionate, charming and honest.
How would you describe your childhood?	I consider my childhood the most beautiful and luckiest part of my life. I grew up in a small town. My mother always kept me active whether it was playing sports, cheerleading, outside playing with the kids in the neighborhood or spending quality time with my parents. I was extremely close with both of my parents even though they went through a divorce when I was about 7 years old. For most kids it is very difficult to go through something like that but my parents always showed the positive side. Yes, it was hard but they never allowed me to see any negativity. When I was 5 years old, my mother gave birth to my sister. That was a very exciting part of my life because at the time I was so excited to be able to help my mom with her. My mother taught me how to change diapers and give her baths. My sister and I grew to have a close relationship.

<p>How would you describe your childhood?</p>	<p>I consider my childhood the most beautiful and luckiest part of my life. I grew up in a small town. My mother always kept me active whether it was playing sports, cheerleading, outside playing with the kids in the neighborhood or spending quality time with my parents. I was extremely close with both of my parents even though they went through a divorce when I was about 7 years old. For most kids it is very difficult to go through something like that but my parents always showed the positive side. Yes, it was hard but they never allowed me to see any negativity. When I was 5 years old, my mother gave birth to my sister. That was a very exciting part of my life because at the time I was so excited to be able to help my mom with her. My mother taught me how to change diapers and give her baths. My sister and I grew to have a close relationship.</p>
<p>What's your favorite childhood memory?</p>	<p>My favorite childhood memory had to be when I would dance around in my grandmother's high heels while she played the organ. I stayed with my grandparents a lot growing up and I had a close relationship with them. My grandmother played the organ for our church. Every morning she would always play for a few hours and I would dance around in her heels. I believe that's what drove me to design shoes to this day. She was an inspiration to me.</p>
<p>Who has been the most influential person in your life, and why?</p>	<p>The most influential person in my life was my grandmother. She inspired me so much. I always went to her when I needed that person to talk to or to get advice from. She always steered me in the right direction. At times I think she believed in me more than I believed in myself. She was so caring and never judged anyone. She was a strong Christian woman.</p>
<p>What awards/accomplishments are you and your family most proud of?</p>	<p>Growing up I played sports so I always got awards. My parents pushed me to give my all in whatever I did in life. I was on the A & B Honor roll all throughout school. I won an award in volleyball my senior year of High school. My family was always proud of me with whatever I did. I won awards for playing the piano as well. I played for about 5 years when I was little. I participated in many recitals and also played in church.</p>
<p>Describe some of your hobbies and interests:</p>	<p>My hobbies include; reading, running, doing hair, shopping for shoes, personal development courses and most importantly designing shoes. Designing shoes is my passion. When I am stressed and need time to myself I go for a nice run. I started doing personal development about a year ago. I have grown a great deal by doing that. I plan to have my own fashion line in the near future and I believe growing yourself is a major key factor.</p>
<p>What sports or activities have you excelled in?</p>	<p>Growing up, I was involved in many sports. In elementary school, I played T-ball. When I got into middle school and High school I got involved in Volleyball. I quickly learned it was my sport and I enjoyed it. I played two years of High school softball but that wasn't where my heart was. I almost went and played college volleyball but I decided not to because I wanted to just focus on academics.</p>
<p>Describe any artistic/musical talents you have:</p>	<p>I am extremely creative when it comes to fashion. Designing shoes is my passion. It's something that brings out the creativity in me. I also played the piano growing up. My grandmother taught me as well as my piano teacher. My father played the drums so he tried getting me to go that direction but I knew I would be good at the piano. I love music in general. I listen to music all the time. I feel like it is a great way to express your emotions and feelings.</p>

<p>What are your future goals?</p>	<p>People sometimes tell me I'm crazy when I mention some of my future goals. I have always been driven in life and knew exactly what I want to accomplish. One of my goals is to have my own fashion empire someday. I want to inspire young women and give back to the world. I want to travel to other countries and help kids who don't have much. I would like to become a successful entrepreneur and be the hand that helps young people with their dreams. I have been very blessed to have been given this opportunity to have my own shoe line; therefore I want to do the same for someone else one day.</p>
